

Usage

The solution which is prepared in Department of Bio Sciences and Bio Engineering, IITB will be drop casted on the cantilever which will be fabricated in IITB Nano Fabrication Lab. The drop casted cantilever will be exposed to ammonia and acetone gas in the gas chamber which is brought from Home Institute (Manipal Institute of Technology) and checked for change in resistance. This is been discussed with Nageshwari ma'am, Ritu ma'am and Pradeep sir. The setup is yet to be installed.
