

Template for usage policy of new chemical

IITBNF Safety team

Usage policy of chemical

- Experimental overview
 - use as a solvent to dissolved the polymer. Then spincoat on the ITO substrate to make the organic solar cell.
- Details of chemicals used along with the chemical applied for clearance (if any)-
 - No
- Procedure
 - Take 10micro liter in the vial to dissloved the polymer.
- Place where experiment will be carried out
 - GB-1
- Precautionary measures
 - Don't expose to air
