

Template for usage policy of new chemical

IITBNF Safety team

Usage policy of chemical

- Experimental overview
 - PTB7-Th is polymer and use as a donor molecule to make the solar cell. PTB7-Th is going to dissolved in the CB. After dissolving it will spincoat to ITO substrates to make the organic solar cell.
- Details of chemicals used along with the chemical applied for clearance (if any)-
 - No
- Procedure
 - 10mg/ml in CB.
- Place where experiment will be carried out
 - GB-1
- Precautionary measures
 - Don't expose to air
