

Olympus Microscope

The optical microscope is used for optical inspection of photomasks, wafers and small samples. It is capable of bright-field, phase contrast and polarization.

Specifications:-

Model	:	BX53-F
Objectives	:	10x, 20x, 40x, 100x
Mode	:	Reflectance/Transmittance with bright field and polarization capability
Substrate allowed	:	All
Substrate size	:	2" wafers and pieces
