

# UV Ozone Cleaner

UV Ozone cleaning system is capable of removing contamination on the surface of samples, providing you with ultraclean surfaces within minutes. By using a high power UV light source ozone is generated which then breaks down surface contaminants into volatile compounds. These volatile compounds evaporate from the surface leaving no trace. This method can produce near-atomically clean surfaces without causing damage to the sample.

## Specifications:-

<b>Model</b>	<b>:</b>	<b>144AX-220</b>
<b>Process time</b>	<b>:</b>	<b>Min. 1 min.</b>
<b>Tray Size</b>	<b>:</b>	<b>12"X 12"</b>
<b>Substrate allowed</b>	<b>:</b>	<b>All</b>
<b>Not allowed</b>	<b>:</b>	<b>Liquid</b>
