

Potentiostat

Make: AUTOLAB

Specifications:

- Frequency: 10 MHz to 1MHz
- Voltage: 0 to 20 V
- Current: 10 nA to 2 A

Features:

- Impedance spectroscopy

General electrochemistry such as cyclic voltammetry, Chronoamperometry, Coulometry etc.

Applications:

- To study redo reactions.
- To measure electrochemical surface area in case of catalyst.
- To find electrical equivalent circuit of chemical system.
