

Training and usage policy

- Controlled access tool.
- Request needs to be submitted by Thursday afternoon 2 pm, which will be scheduled to be executed on Friday. Maximum number of 2 requests will be served every week on first come first serve basis. The additional requests will be kept in a queue.
- Requests will not be migrated to other days in case the tool is down in those days.
- Slots are not transferrable
- Only RF measurement will be done, with available facilities.
- Devices should have GSG probe pads with center to center spacing of 100um
- Any semiconductor substrate is allowed.
- Sample history for each sample will be thoroughly checked. Any incomplete or ambiguous declaration will delay the process.

Any significant deviation will lead to reviewing this usage policy.
